STORY

The story goes back to 1850 with Pedro Ruiz Vázquez (great-great-grandfather of the current manager of Xocolalla) and the first in line for the succession, who began his journey in the world of traditional confectionery in Toledo. The business was transferred to the children when they got married and formed their own family for many years. They developed their activity in La Mata (Toledo) and had the workshop in their own house, which they transformed into a Christmas campaign.

Federico Ruiz, a great professional and passionate about this sector, left La Mata to train and, in 1961, he graduated from the Professional School of Confectionery and Bakery of Barcelona, an exclusivity at that time! Upon his return, he moved to Santa Olalla and began a long, hard and at the same time a satisfying career.

Little by little, Federico passed on to his son Jose Antonio Ruiz Blanco all his knowledge and experience. Moreover, Jose Antonio is conducting several thematic courses on food products and he obtained his diploma in business management in 1988 from the Spanish Confederation of Small and Medium Enterprises. In 2000 and 2002, they traveled together to Italy and Switzerland respectively to learn from the great master chocolatiers and decided to invest in new chocolate machines to enter this exciting world.

In 2021, after more than 170 years the **CONFECTIONERY TRADITION OF TOLEDO**, Xocolalla was born in Santa Olalla, a company dedicated exclusively to the manufacture of chocolate products, which, despite the automation of certain processes, they continue to have as the main purpose is to use raw materials of high quality and their origin of proximity. Being the main objective to meet the needs of its customers through the continuous attention and excellence of its products.

In addition, in 2022, at Xocolalla, we decided to make our contribution to reducing the carbon footprint, by making a major investment to install photovoltaic plates and by investing in solar energy.

QUALITY

At Xocolalla, one of our main goals is to achieve customer satisfaction. This commitment can be seen in our quality controls, which are applied at every stage of the production process, ensuring that the product reaches the consumer in excellent condition.

In addition, we always demand from our suppliers a series of essential requirements in order to offer products that comply with food safety requirements.

A detailed line art illustration of cacao pods, leaves, and flowers, arranged in a circular pattern around the central text. The pods are shown in various stages of ripeness, some open to reveal the seeds inside. The leaves are large and have a prominent vein structure. The flowers are small and delicate, with long stamens.

A detailed line art illustration of cacao pods, leaves, and flowers, rendered in a light blue color. The pods are shown in various stages of ripeness and are scattered across the page, with some showing the seeds inside. The leaves are large and have a prominent vein structure. The flowers are small and delicate, with five petals and a central stamen. The overall composition is a dense, artistic representation of the cacao plant.
